Liver SABR workshop

Thursday 8 July 2021

10:00 – 17:30 BST

Stereotactic radiotherapy for hepatocellular carcinoma is a flexible, effective, and safe loco-regional therapy and is fully commissioned for use in the English NHS. Over the last four years, leading HCC centres have set up SABR services and successfully integrated it into their treatment pathways. Liver SABR can be complex – case selection and careful radiation delivery are paramount – so join us in this multi-disciplinary workshop to discover how to implement SABR in your centre. Treatment of liver metastases will also be included in the contouring session.

The morning session, led by the RCR and endorsed by HCC-UK, is suitable for all members of the liver MDT and will cover:

- Overview of the evidence base
- Hepatology, medical oncology, and radiology perspectives
- Integration with other loco-regional therapies such as RFA, TACE and SIRT

The afternoon session, led by the UK SABR Consortium, will be of most interest to radiotherapy professionals and will focus on practical implementation:

- Radiographer and dosimetry perspectives
- The emerging role of MR guidance
- A hands-on contouring session, with access to EduCase in advance for preparation of test cases and online review by experienced liver SABR clinicians

We hope you will be able to join us for the workshop.

AGENDA

RCR+affiliates to run a morning webinar on their platform covering the following topics

10.00-10.30 Introduction to SABR for HCC, Dr James Good, University Hospitals Birmingham NHS Foundation Trust

10.30-11.00 Hepatology perspective, Dr Ian Rowe, Leeds Teaching Hospitals NHS Trust

11.00-11.30 Medical oncology perspective, Dr Yuk Ting Ma, Dr James Good, University Hospitals Birmingham NHS Foundation Trust

11.30-12.00 Radiology perspective, Dr Raneem Albazaz, Leeds Teaching Hospitals NHS Trust

12.00-12.30 Panel discussion on incorporating SABR into the HCC MDT

SABR Consortium/Profile Productions to run afternoon webinar on their platform covering

13.00-13.30 Liver met SABR overview, Dr Katharine Aitken, The Royal Marsden NHS Foundation Trust

13.30-14.00 Radiographer perspective, Ms Julie Kilkenny, University Hospitals Birmingham NHS Foundation Trust

14.00-14.30 Liver planning and dosimetry, Dr Maxwell Robinson, University of Oxford

14.30-15.00 Role of MR guidance in treating liver tumours, TBC

15.00-15.30 Break

15.30-17.00 Contouring session, led by Dr James Good, Dr Charles Fong, Dr Rebecca Goody, Dr Emma Dunne and Dr Rob Owens

17.00-17.30 Q&A with faculty
